

Paul F. Pollice M.D.

As a dedicated hip and knee surgeon and son of a physician, Dr. Pollice knows firsthand that the best medical care is a combination of leading edge technology and excellence in patient care.

Dr. Pollice joined OAA Orthopaedic Specialists in 2001 after completing his residency in orthopaedic surgery at the University of Rochester, Strong Memorial Hospital, NY and a fellowship in Adult Reconstruction at the Hospital of the University of Pennsylvania, Philadelphia.

Dr. Pollice uses the latest joint replacement technologies and is an expert in all joint replacement procedures of the hip and knee. He performs approximately 600 hip and knee joint replacement procedures each year. Despite a high quantity of surgery performed, Dr. Pollice remains committed to the patient experience and provides a compassionate and individualized approach for EACH patient.

Dr. Pollice became the first certified physician in the region to perform total knee replacements using Computer-Assisted (CI) surgery, a unique system which provides surgeons with a three-dimensional view of the knee joint and precise data on the knee's anatomy. This minimally invasive surgical technique gives the surgeon a higher degree of surgical accuracy and control, while patients benefit from smaller incisions, shorter recovery times, and optimized function. Dr. Pollice also provides second opinions for patients that have problems with existing hip and knee replacements. Oftentimes, he is able to improve the performance and achieve pain relief for patients suffering from painful hip and knee replacements.
